

## Consulting Services: ISO 27001:2013

The ISO 27001:2013 standard specifies requirements for establishment, implementation, maintenance and continual improvement of an Information security management system. LexNimble Team will ensure in providing professional consultancy solutions that puts a solid ISMS foundation.

Information is an asset which, like other important business assets, has value to an organization and consequently needs to be suitably protected. Information Security protects information from a wide range of threats in order to ensure business continuity, minimize business damage and maximize return on investment and business opportunities.

Our ISO27001 consulting services helps organizations build an effective Information Security Management System (ISMS) through a set of inter related services. Our consulting team comprising of Subject Matter Experts have the knowledge and skills to provide the consultancy and implementation services for the standard implementation.

We also provide Integrated Standards Management System incase you have multiple standards in place in your organization and need an integrated approach to the ISMS.

## Why ISO 27001 Required

Information and the information assets are becoming increasingly critical to any business centric IT aligned organization. Each information asset has a lifecycle. Right from the purchase, development, Generation, use, distribution, storage, maintenance and finally disposal, the information asset has to be protected for the benefit of the organization.

## Our Implementation Methodology:

- + Training on ISO/IEC 27001:2013.
- + Gap analysis against controls.
- + Scope definition.
- + Develop policies.
- + Asset identification.
- + Risk assessment.
- + Develop Statement of applicability.
- + Develop Mandatory Procedures.
- + Implementation workshop for facilitating better understanding.

Our ISO 27001 consultants will ensure that the above ISO 27001 consulting services are executed with dedication and in a timely fashion. Our ISO 27001 Consultants make sure that the ISO 27001 implementation helps you to effectively establish, monitor and continually improve the Information Security Management System.
