

## Consulting Services

### Project Management Consulting

Project Management is one of our core specialties. Our project management leaders have successfully managed projects of varying magnitudes everything from large-scale, enterprise-wide projects to small project teams deploying front-line initiatives.

Our unique experience in IT, Engineering and service industry helps us to tailor the best practices of Project management to meet the specific requirements of our customers in meeting their specific needs in project management pertaining to Training, Consulting and Mentoring.

Lex Nimble consultants have successfully helped companies improve project profitability, streamline conversion costs, manage limited resources and achieve on-time delivery.
