

## Six Sigma Yellow Belt Training

Six Sigma is globally accepted continuous improvement methodology for Quality Management. In order to sustain in today's competition and to keep their competitive edge all organizations main focus has shifted towards Quality Management. Quality Initiatives also result not only in improvement in customer satisfactions but also increase profit. Six Sigma is a disciplined method based on statistical tools to eliminate the deviation in process, product or service.

Six Sigma Yellow Belt training is ideal for Six Sigma beginners which provides foundational elements of Six Sigma methodology in delivering successful projects. Six Sigma Yellow Belt possesses an understanding of the aspects within the phases of Define - Measure - Control (D-M-C) within the Six Sigma D-M-A-1-C.

You will understand and apply the concepts and techniques required for successful process improvement as well as their impact on any organization.

Six Sigma is a step-by-step process of interventions and statistical tools that allows companies to interpret which business processes need attention, identify root causes of problems, and sustain gain in improvements.

Lex-Q's training program in Six Sigma yellow Belt is an exclusive program for every individual who wants to make their career in the quality domain. Six Sigma yellow Belt qualified individuals will be able to support development projects.

## Testimonials

“After getting trained on Six Sigma Yellow Belt at LexNimble Solutions, I started using Lean Six Sigma principles to align our improvement efforts with our business strategy. It helped the company reduce error rates when importing data by 70% and reduce waste in processes which equated to saving about 550 hours of time per year.”
