

Microsoft Technologies Services

.NET Application Development

Lex Nimble Solutions has experience and expertise in providing best-in-class .NET Application development services. We help enterprises and technology driven companies and startups build contemporary applications on the .NET platform.

Our development team has solid experience in software programming using various Microsoft development environments (C#, MVC, ASP.NET, Orchard CMS, SharePoint, VB .NET, WPF or Win Forms).

We rapidly develop future-ready, tailor-made applications, leveraging .NET technology alongside SQL server and performance-tuning capabilities.

Areas of Expertise

- + .NET custom software development.
- + .NET web based solution development.
- + Migration of both desktop and web applications to .NET platform.
- + Legacy .NET applications updating, enhancement and support.
- + Web services, WCF, WPF, XML, XSL.
- + Enterprise .NET Application Development.
- + Development of web services using .NET framework.
- + .NET Architecture & Design Evaluation.
